Real programmers don't grumble about the disadvantages of Fortran when they don't know any other wow gold language. Real programmers don't notch their desks for each completed service request. Real programmers world of warcraft gold don't number paragraph names consecutively. Real proga horse and a chicken are playing in cheap wow gold a meadow. the horse falls into a mud hole and is sinking. he calls runescape money to the chicken to go and get the farmer to help pull him out buy wow gold to safety. the chicken runs to the farm but the farmer can't be found. rs gold so he drives the farmer's mercedes back to the mud hole and ties some cheap rift gold rope around the bumper. he then throws the other end of the rope to rift plat his friend, the horse, and drives the car forward saving him from sinking! a rift gold few days later, the chicken and horse were playing in the meadow again and the chicken fell into the mud hole. the chicken yelled to the horse to go and get some help from the farmer. the horse said, "i think i can stand over the hole!" so he stretched over the width of the hole and said, "grab for my 'thingy' and pull yourself up." and the chicken did and pulled himself to safety. the moral of the story is: if you are hung like a horse, you don't need a mercedes to pick up chicks.
